Introduction

Title

- English Script for Medical Communication Practice

Objective

- Equip learners with English vocabulary and conversational skills in medical contexts, focusing on:
 - Medical careers and their roles
 - Symptoms and phrases for effectively describing health concerns

Scenario

- Interactive dialogue between teacher and learner

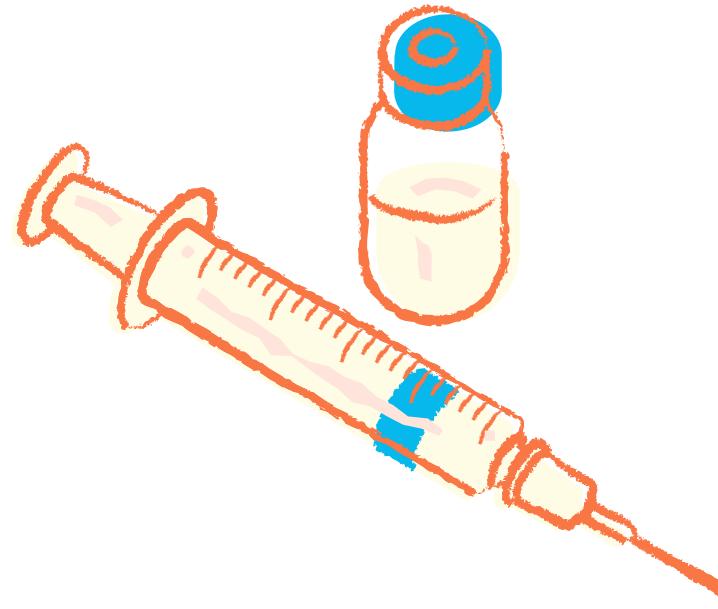

Careers in the Medical Field

Nursing Assistant

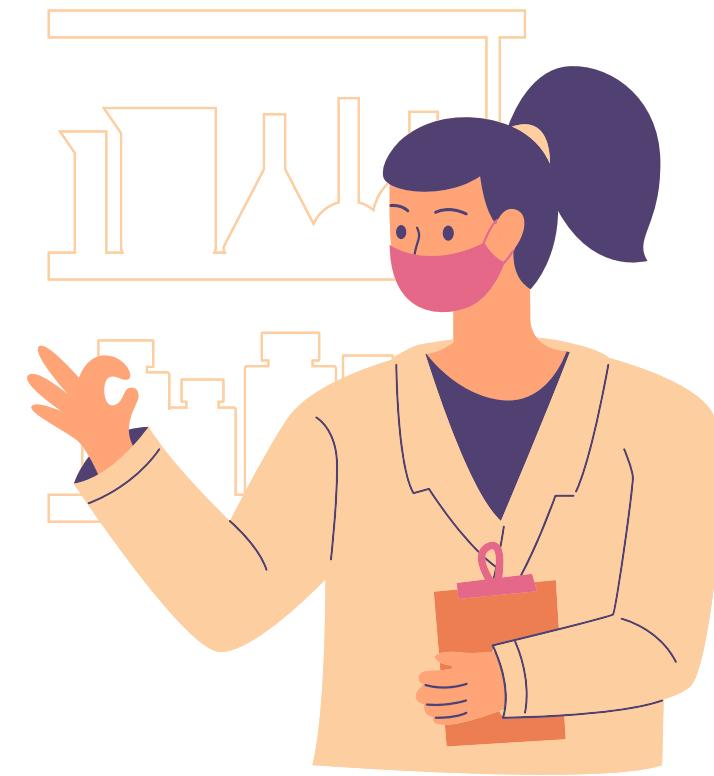

- Role: Provides basic care (vital signs, daily tasks) for patients with disabilities or chronic illnesses
- Workplaces: Hospitals, nursing homes, home care, etc.

Medical Receptionist

- Role: Manages clerical tasks, schedules appointments, assists patients
- Workplaces: Clinics, labs, medical offices

Careers in the Medical Field

Pharmacist (Chemist)

- Role: Prepares, dispenses medications, provides pharmaceutical advice

Veterinarian

- Role: Medical care for animals (diagnosis, preventive care, treatment)
- Responsibilities: Vaccinations, breeding management, zoonotic disease control

Ultrasound & MRI Technicians

- Ultrasound Technician: Creates sonographic images for diagnostics
- MRI Technician: Operates MRI for detailed internal imaging (doctor's referral)

Sample Medical Dialogue

Teacher-Learner Conversation Highlights

- Teacher introduces medical professions, explains their roles
- Learner gains clarity on terms like "pharmaceutical advice," "veterinarian," and "MRI"
- Emphasis on interactive Q&A for a deeper understanding of each profession

Sample Clinical Visit Dialogue

Situation: Patient, Alex Smith, seeks treatment for flu symptoms

Receptionist

Gathers patient information,
directs him to doctor

Doctor

Assesses symptoms, prescribes
medication, provides care advice

Follow-Up

Receptionist assists with follow-
up options and support

Key Takeaways & Practice

Vocabulary for Common Medical Interactions

- Jobs, symptoms, common phrases

Scenario Practice

- Learners role-play both patient and medical staff roles

Next Steps

- More in-depth script practice in clinical scenarios
